METHODS, DRAWN.

A first look at 12 of the 225 monochrome mechanism drawings

M022

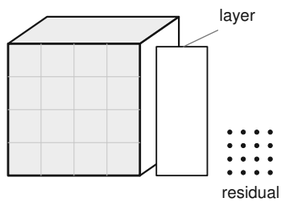

Tame/wild collision recovery

tame walk | shared curve point | wild walk

M038

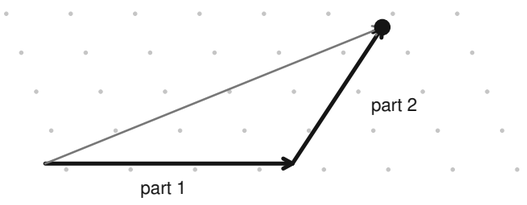

Cubic scalar decomposition

original scalar | cube + layer | residual

M053

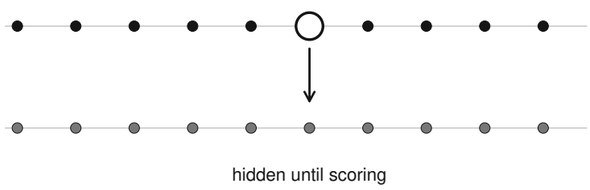

GLV scalar decomposition and endomorphism

full scalar | balanced split | endomorphism sum

M059

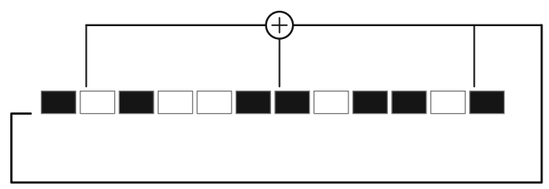

Leave-one-out full-slot backtest

leave one key out | fit full slots | reveal and score

M088

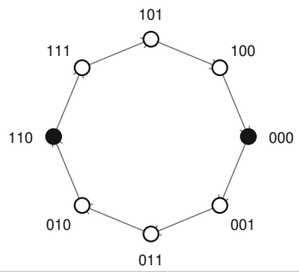

LFSR / Berlekamp-Massey reconstruction

observed bits | feedback taps | reconstructed register

M108

Gray-code range and anchor walks

anchor bits | one bit changes | Gray-code walk

M122

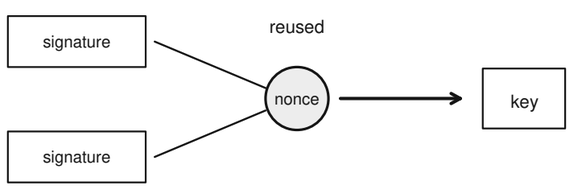

Cantor-like finite-stage constructions

starting interval | remove middle thirds | finite-stage set

M134

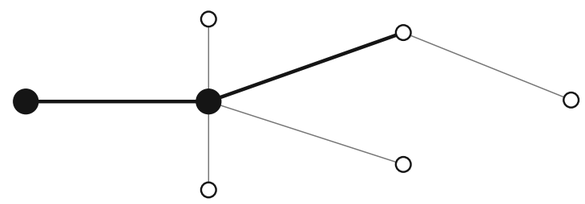

ECDSA nonce-reuse recovery

two signatures | same nonce / matching r | algebraic key recovery

M153

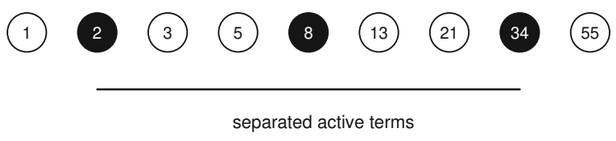

0.99-BTC fanout cluster tracing

funding inputs | 0.99-BTC outputs | neighboring cluster

M185

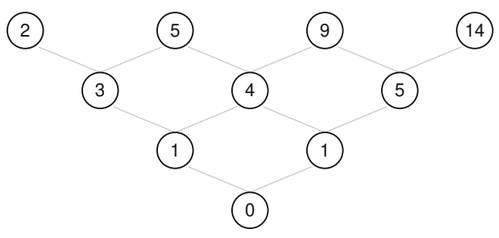

Zeckendorf/Fibonacci sparsity

integer value | nonadjacent Fibonacci terms | sparse representation

M202

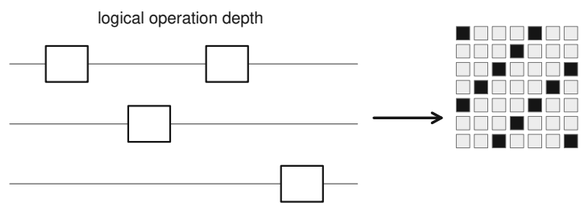

Finite modular difference triangles

finite residue row | neighbor subtraction | shrinking triangle

M223

Surface-code/platform timing estimates

logical operations | code-distance overhead | physical time / qubits
