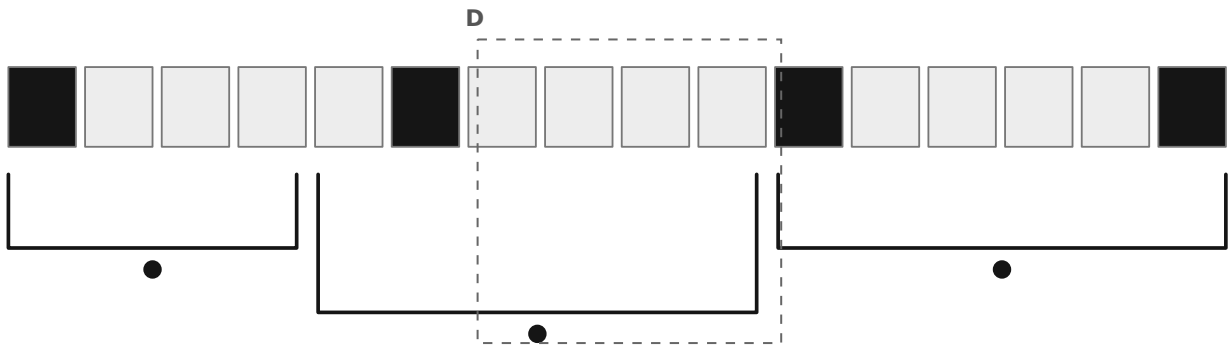
M160

Complete chat-lead indexing and candidate extraction

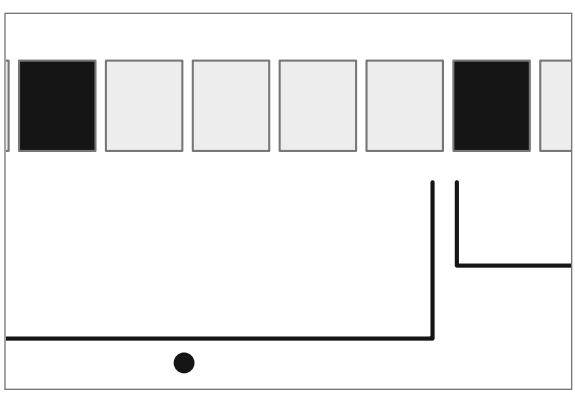


01 complete chat records

02 speaker and source tags

03 indexed candidate leads

D / OPERATION DETAIL



Vector detail / 1.13× main-view scale

HOW THE OPERATION WORKS

Index complete available user/assistant messages, distinguish speakers and extract only relevant candidate claims or supplied leads.

READ THE THREE STAGES

01 complete chat records
02 speaker and source tags
03 indexed candidate leads

WHAT WAS ACTUALLY DONE

Existing audit scripts preserve source hashes, locators and redacted witnesses. Chat assertions can guide tests, but a model's claim of running code is not substituted for execution artifacts.

ORIGINAL FINDING / EXECUTED RECORD

Existing speaker-aware source index covers 685 matching conversations; assistant assertions are not execution evidence.
