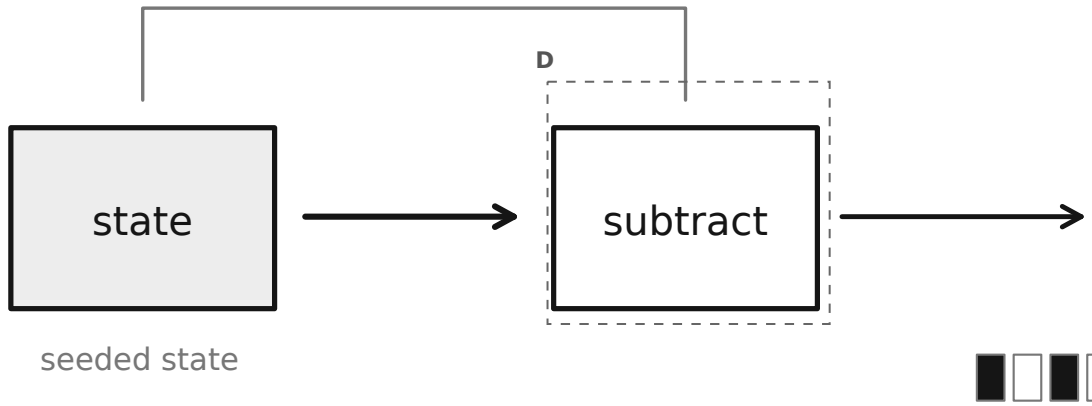
M176

.NET System.Random replay

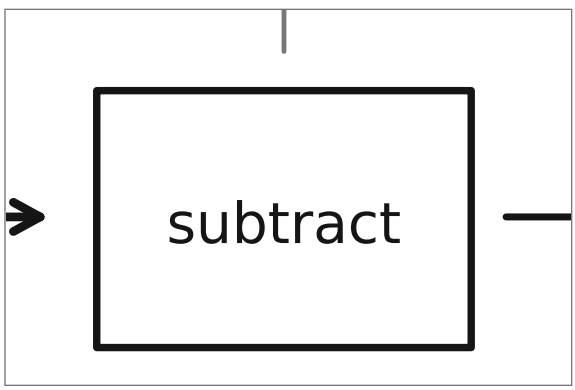


01 TickCount-style seed

02 .NET subtractive state

03 replayed outputs

D / OPERATION DETAIL



Vector detail / 1.42× main-view scale

HOW THE OPERATION WORKS

Explicitly seeded .NET System.Random evolves subtractive state; low-entropy TickCount-style seeds allow replay.

READ THE THREE STAGES

01 TickCount-style seed
02 .NET subtractive state
03 replayed outputs

WHAT WAS ACTUALLY DONE

The model reproduces the framework-compatible byte stream and supports runtime vectors. Newer runtime semantics or additional entropy require a different model.

ORIGINAL FINDING / IMPLEMENTED/REGISTRY

Models explicitly seeded subtractive generator and TickCount-style seed scope.
